

Davron Usmonov

Senior Frontend Developer · Vue.js Expert

Tashkent, UZ · Senior Remote Contractor / Full-Time Employee · Currently: Route4Me (US) · UTC+5 · CET/EST overlap · no relocation needed
akunin94@gmail.com · linkedin.com/in/davron-usmonov · github.com/Akunin94 · t.me/akunin

SUMMARY

Senior Frontend Developer with 12+ years of experience, 6+ specializing in Vue.js (Vue 2/3, Nuxt.js, Composition API, Pinia, TypeScript). Currently at Route4Me (US), owning the Customers & Locations domains — building mapping and territory management solutions that power daily route operations for thousands of logistics teams. Led Vue 2 → 3 migration for 40+ components, introduced composable architecture across 5+ feature modules, and drove 40% reduction in critical code-quality issues. Actively building AI-powered apps (Claude API, SSE streaming, RAG pipelines). 3 years proven remote with a US company — stable setup, no onboarding friction. Available for EU/US remote roles.

EXPERIENCE

Senior Frontend Developer · Route4Me

Sep 2023 – Present · Remote · Enterprise SaaS — Route Optimization & Logistics (San Diego, US)

Stack: Vue 3, TypeScript, TailwindCSS, Vite, Pinia, Google Maps API, Storybook, Webpack, SCSS, Jest, Vue Test Utils, Vitest, i18n

- Owned Vue 2 → Vue 3 migration for 40+ core components, eliminating runtime compatibility issues and reducing technical debt.
- Built and maintained territory management and customer assignment modules using Google Maps JS API, handling complex geospatial interactions at scale.
- Introduced composable architecture patterns (Composition API), improving code reuse across 5+ feature modules and reducing average component size by ~30%.
- Wrote unit testing with Jest and Vue Test Utils for critical components; established Storybook-based design system workflow, conducted regular code reviews and mentored 2 junior developers.
- Implemented i18n / localization for multi-region UI; ensured responsive, cross-browser compatible interfaces across desktop and tablet.
- Integrated Pusher/WebSocket for real-time route updates; implemented vis-timeline and vx-table for data-heavy interfaces.
- Worked in an Agile / Scrum team on 2-week sprint cycles; drove SonarQube code quality improvements, reducing critical issues by 40% over two quarters.

Team Lead (Frontend) · Mixelium Games

Feb 2023 – Aug 2023 · Oslo, Norway (Remote)

Stack: TypeScript, Vue.js, Nuxt.js, Strapi, GraphQL, PostgreSQL, Jest, Storybook

- Led a 5-person frontend team in an Agile / Scrum process: task distribution, code reviews, sprint planning and coordination, and onboarding.
- Architected and developed corporate marketplace and partner web apps with Vue.js / Nuxt.js and a Strapi CMS backend, consuming data via GraphQL and REST APIs.
- Integrated Web3 wallet features; wrote Jest test coverage for critical flows.

Senior Frontend Developer · Zenclass

Feb 2022 – Jan 2023 · Online School Platform

Stack: Vue 2/3, Vuex, Laravel, Docker, PostgreSQL, Webpack, Storybook

- Delivered new features and refactored legacy components in a Laravel + Vue 2/3 monolith; introduced component-level testing patterns.
- Built responsive, cross-browser compatible interfaces ensuring consistent UX across devices and browsers.

Middle Frontend Developer · Lionsdigital.pro

Aug 2021 – Feb 2022 · Fergana, Uzbekistan

Stack: Vue 2, TypeScript, Vuex, JSON RPC, OAuth 2.0, Element UI

- Built multilingual student notification system; migrated auth to OAuth 2.0; launched university schedule module serving 1000+ students.
- Delivered responsive, cross-browser compatible layouts across the platform's public and authenticated views.

Frontend Developer (HTML → Vue SPA) · Megagroup.ru

Dec 2013 – Jul 2021 · 7 yrs 8 mos · Fergana, Uzbekistan

7+ years building client web applications, landing pages, and e-commerce solutions for small and medium businesses; grew from HTML/CSS layout to full Vue 2 SPA development across 300+ production websites.

Frontend Developer (Vue SPA) · Jan 2020 – Jul 2021

Stack: Vue 2, Vuex, Vue Router, Nuxt.js, JavaScript, SCSS

- Developed and maintained client-facing single-page applications on Vue 2, refactoring legacy pages into a modern, reusable component architecture.
- Integrated Google Maps and Yandex Maps for logistics, freight, and taxi-service clients, implementing custom routing, geocoding, and geolocation features.

Web / HTML Developer · Dec 2013 – Jul 2020

Stack: JavaScript, HTML5, CSS3, Adaptive layout, jQuery, PHP/Smarty, Ajax

- Built responsive, cross-browser HTML/CSS layouts for websites, landing pages, and online stores, delivering pixel-perfect adaptive designs.
- Created interactive calculators, form constructors, and complex custom forms; collaborated with backend developers to ship production features.

PROJECTS

DevJobTracker · dev-job-tracker.vercel.app

Mar 2026 – Present · Personal — Job search pipeline tracker with Kanban board

Stack: Nuxt 3, Vue 3, TypeScript, Pinia, Supabase (PostgreSQL + Auth + Realtime), TailwindCSS, Vitest, Vercel

- Built production-ready Kanban app with 5-column pipeline (Wishlist → Offer), drag-and-drop with optimistic updates and rollback on DB error.
- Implemented GitHub OAuth 2.0 via Supabase Auth with Row-Level Security — data isolation enforced at DB level, zero manual user filtering in queries.
- Added real-time sync via Supabase postgres_changes subscriptions; deadline tracking with color-coded urgency badges and analytics dashboard with conversion funnel.

Route Planner AI · route-ai-nine.vercel.app

Aug 2025 – Present · Personal — AI-powered route planning app

Stack: Vue 3.5, TypeScript 5.8, Vuetify 3, Pinia, Vite 6, Google Maps API, Claude API

- Built multi-stop route planner with AI assistant (Claude API) providing real-time optimization suggestions via SSE streaming.
- Implemented Google Places Autocomplete, drag-and-drop waypoint reordering, map marker dragging with auto reverse-geocoding.
- Designed shareable link system encoding full route state in URL; achieved <2s initial load with Vite code splitting.

AI Assistant Platform · ai-front-puce.vercel.app

Aug 2025 – Feb 2026 · Personal — Full-stack AI assistant with RAG

Stack: Vue 3, TypeScript, Express, LangChain, Claude API, HNSWlib + OpenAI Embeddings

- Built end-to-end AI assistant platform with SSE streaming, RAG pipeline for document understanding, and structured code review.

TECHNICAL SKILLS

Frontend	Vue 2/3, Composition API, Vuex, Pinia, Nuxt.js, React (2 yrs)
Languages	TypeScript (5+ yrs), JavaScript ES6+, HTML5, CSS3/SCSS
Build Tools	Vite, Webpack, pnpm
UI Libraries	TailwindCSS, Vuetify, Element UI
Backend / DB	Supabase (PostgreSQL + Auth + Realtime), Express, Node.js
APIs	Google Maps JS API, Claude API (Anthropic), GraphQL, Pusher/WebSocket, REST, JSON RPC
Testing & QA	Jest, Vitest, Vue Test Utils, unit testing, Percy, SonarQube, Storybook
i18n / UX	i18n, localization, responsive, cross-browser
DevOps & Tools	Git, GitHub Actions, Docker, CI/CD, Vercel, Agile, Scrum

EDUCATION

Fergana Polytechnic Institute · Bachelor's degree in Engineering · 2013–2017
Self-taught software developer since 2013; transitioned to full-time frontend development by 2020.
