Davron Usmonov

Senior Frontend Developer · Vue.js Expert

Senior Remote Contractor / Full-Time Employee · Currently: Route4Me (US) · **Flexible hours — can adapt to any timezone** (3+ yrs of CET/EST overlap) · **Open to relocation (EU/US) & remote**

akunin94@gmail.com · akunin94.github.io/portfolio · linkedin.com/in/davron-usmonov · github.com/Akunin94 · t.me/akunin

SUMMARY

Senior Frontend Developer with 12+ years in web development, 6+ as a frontend engineer specializing in Vue.js (Vue 2/3, Nuxt.js, Composition API, Pinia, TypeScript). Own the Customers & Locations domains at Route4Me (US) — mapping and territory-management tools used daily by thousands of logistics teams. Led the Vue 2 → 3 migration of 40+ core components. 3 years of proven remote work with a US product team; building AI-powered apps (Claude API, SSE streaming, RAG) on the side.

EXPERIENCE

Senior Frontend Developer · Route4Me

Sep 2023 – Present · Remote · Enterprise SaaS — Route Optimization & Logistics (US)

Stack: Vue 3, TypeScript, TailwindCSS, Vite, Pinia, Google Maps API, Storybook, SCSS, Jest, Vue Test Utils, Vitest, i18n

- Own the Customers & Locations domains — mapping and territory-management features used daily by thousands of logistics teams planning routes with 10,000+ stops.
- Led the Vue 2 → Vue 3 migration for 40+ core components, eliminating runtime compatibility issues and reducing technical debt.
- Optimized data-heavy screens: marker clustering, virtualized tables for 10k+ rows, route-based code splitting and lazy-loaded map modules — cut the main bundle by ~35% (Vite bundle analyzer, gzipped) and improved LCP from ~4.2s to ~2.1s on key dashboards (Lighthouse lab + p75 field data); map-related support tickets dropped by roughly a third the following quarter.
- Built and maintain territory-management and customer-assignment modules on Google Maps JS API, handling complex geospatial interactions at scale.
- Introduced composable architecture patterns (Composition API), improving code reuse across 5+ feature modules — average component size in the refactored domains down by roughly a third.
- Championed accessibility (WCAG 2.1 AA): keyboard navigation and ARIA patterns for complex map and table widgets, contrast audits in the design system.
- Established a testing culture: Jest + Vue Test Utils for critical components, Percy visual regression in the GitHub Actions CI pipeline, mentoring of 2 junior developers; drove SonarQube improvements — critical issues down 40% over two quarters (quality-gate reports).

Senior Frontend Developer · Maxelium Games

Feb 2023 – Aug 2023 · Remote (Oslo, Norway) · *startup wound down after its investor withdrew funding*

Stack: TypeScript, Vue.js, Nuxt.js, Strapi, GraphQL, PostgreSQL, Jest, Storybook

- Architected and built a corporate marketplace and partner web apps with Vue.js / Nuxt.js and a Strapi CMS backend, consuming data via GraphQL and REST APIs.
- Shipped SSR on Nuxt.js for SEO-critical marketplace pages: server-side rendering with resolved hydration mismatches — ~2× faster First Contentful Paint vs the CSR baseline (Lighthouse lab runs), SEO score 95+.
- Designed the frontend architecture: typed API layer (TypeScript), clear module boundaries, and a shared Storybook UI kit reused across the marketplace and partner apps.
- Integrated Web3 wallet features (auth, transaction signing) with robust error and retry handling; wrote Jest test coverage for critical purchase flows.
- Modeled Strapi CMS content types together with the backend developer and wrote typed GraphQL queries and fragments for content-driven marketplace pages.
- Worked directly with the founders and designer in English: scoped features, estimated work, and demoed increments in weekly reviews.

Senior Frontend Developer · Zenclass

Feb 2022 – Jan 2023 · Online School Platform · *project completed and delivered*

Stack: Vue 2/3, Vuex, Laravel, Docker, PostgreSQL, Webpack, Storybook

- Delivered new features and refactored legacy components in a Laravel + Vue 2/3 monolith; introduced component-level testing patterns.
- Drove incremental Vue 2 → Vue 3 adoption inside the monolith: extracted shared logic into composables and isolated legacy code behind typed interfaces.
- Built and maintained student-facing learning flows (course player, quizzes, progress tracking) used daily by thousands of students.
- Improved perceived performance of student-facing dashboards (code splitting, asset optimization) and ensured accessible, keyboard-navigable UI across enrollment and learning flows.
- Partnered with Laravel backend developers on API contracts; maintained a Dockerized dev environment for consistent onboarding.
- Consolidated recurring UI patterns into a shared, Storybook-documented component library reused across student and admin views.
- Estimated and planned frontend scope with the product owner; delivered the contracted milestones on schedule through final handover.

Middle Frontend Developer · Lionsdigital.pro

Feb 2021 – Feb 2022 · 1 yr · EdTech · *product since moved to support-only mode*

Stack: Vue 2, React, TypeScript, Vuex, JSON RPC, OAuth 2.0, Element UI

- Built a multilingual student notification system; migrated auth to OAuth 2.0; launched a university schedule module serving 1,000+ students daily.
- Developed form-heavy admin and student interfaces on Vue 2 + TypeScript with complex validation and error handling (Element UI).
- Wrote typed wrappers around the JSON RPC API layer, reducing runtime errors and simplifying refactoring.
- Localized the platform's public and authenticated views (i18n); participated in code reviews and cross-device bug triage.

Middle Frontend Developer (Vue SPA) · Megagroup.ru

Jan 2020 – Jan 2021 · Web solutions for SMB e-commerce

Stack: Vue 2, Vuex, Vue Router, Nuxt.js, React, JavaScript, SCSS

- Developed and maintained client-facing single-page applications on Vue 2 and React, refactoring legacy pages into a modern, reusable component architecture.
- Integrated Google Maps and Yandex Maps for logistics, freight, and taxi-service clients — custom routing, geocoding, and geolocation features.

Web / HTML Developer · Megagroup.ru

Dec 2013 – Dec 2019 · 6 yrs

Progressed from static HTML/CSS layouts to complex interactive JavaScript applications across 300+ delivered client projects (websites, landing pages, online stores), collaborating with backend developers to ship production features.

PROJECTS

DevJobTracker · dev-job-tracker.vercel.app

Mar 2026 – Apr 2026 · Personal — Pipeline tracker with Kanban board

Stack: Nuxt 3, TypeScript, Pinia, Supabase (PostgreSQL + Auth + Realtime), TailwindCSS, Vitest, Vercel

- Built production-ready Kanban app with 5-column pipeline (Wishlist → Offer), drag-and-drop with optimistic updates and rollback on DB error.
- Implemented GitHub OAuth 2.0 via Supabase Auth with Row-Level Security — data isolation enforced at DB level, zero manual user filtering in queries.
- Added real-time sync via Supabase postgres_changes subscriptions; deadline tracking with color-coded urgency badges and analytics dashboard with conversion funnel.

Route Planner AI · route-ai-nine.vercel.app

Aug 2025 – Present · Personal — AI-powered route planning app

Stack: Vue 3.5, TypeScript 5.8, Vuetify 3, Pinia, Vite 6, Google Maps API, Claude API

- Built multi-stop route planner with AI assistant (Claude API) providing real-time optimization suggestions via SSE streaming.
- Implemented Google Places Autocomplete, drag-and-drop waypoint reordering, map marker dragging with auto reverse-geocoding.
- Designed shareable link system encoding full route state in URL; achieved <2s initial load with Vite code splitting.

AI Assistant Platform · ai-front-puce.vercel.app

Aug 2025 – Feb 2026 · Personal — Full-stack AI assistant with RAG

Stack: Vue 3, TypeScript, Express, LangChain, Claude API, HNSWLib + OpenAI Embeddings

- Built end-to-end AI assistant platform with SSE streaming, RAG pipeline for document understanding, and structured code review.
- Implemented the RAG pipeline end-to-end: document chunking, OpenAI embeddings, and HNSWLib vector search via LangChain.

TECHNICAL SKILLS

Frontend	Vue 2/3, Composition API, Nuxt.js (SSR), Pinia, Vuex, React (2 yrs)
Languages	TypeScript (5+ yrs), JavaScript ES6+, HTML5, CSS3/SCSS
Performance	Core Web Vitals (LCP / CLS / INP), code splitting, lazy loading, list virtualization, bundle analysis, Lighthouse
Build Tools	Vite, Webpack, pnpm
UI Libraries	TailwindCSS, Vuetify, Element UI
Backend / DB	Supabase (PostgreSQL + Auth + Realtime), Express, Node.js
APIs	Google Maps JS API, Claude API (Anthropic), GraphQL, Pusher/WebSocket, REST, JSON RPC
Testing & QA	Jest, Vitest, Vue Test Utils, Percy, SonarQube, Storybook
i18n & a11y	Localization, WCAG 2.1 AA, responsive & cross-browser UI
DevOps & Tools	Git, GitHub Actions, Docker, CI/CD, Vercel, Agile, Scrum

EDUCATION

Fergana Polytechnic Institute · Bachelor's degree in Engineering · 2013–2017
Self-taught software developer since 2013; transitioned to full-time frontend development by 2020.

LANGUAGES

English — B2, daily working language for 3+ years (standups, code reviews, documentation) · Russian — Native · Uzbek — Native
